For development files
Steps to run it

1)npm install
2)npm run dev
3)streamlit run app.py

Steps to run RAG System for the getting answers when the query is irrelevant to all the other existing API's

1)Enter your project folder:
cd PolicyRetrievalService

2)Activate your virtual environment:
venv\Scripts\activate

3)Install all dependencies:
pip install -r requirements.txt

4)Run the RAG Pipeline:
python run_pipeline.py
next command python query.py
